

Breastwear

Version 08.03.1.

Design Veronique® Breastwear

Design Veronique® bras are designed to provide the ideal level of compression or support after any breast procedure- from breast augmentation to a breast reduction or reconstruction. Our bra collection features over 11 different kinds of bras, 2 compression vests and a variety of breast wraps. Our bra's are made from soft, breathable cotton and/or powernet fabric, there are no seams at key surgical sites for extra comfort. Sizing is easy with no cup size required, the bra cup is designed to contour to the size and shape of the breast.

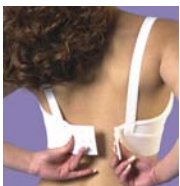

The breastwear is very adjustable with most styles featuring adjustable Velcro® shoulder straps, front closures and adjustable hook & eye back closures. Most bras are offered in three colors: black, white and champagne and a full size range of XS-3X.

As with all Design Veronique® products, we make every piece in our California corporate headquarters to ensure the highest quality standards.
