# Male Garments

Version 08.03.1.

## Design Veronique® Male Garments

### **Uniquely designed styles based on the male form**

Design Veronique® Male compression garments include body contouring garments and facial bands. Through a unique fusion of design, fabric, and construction, our garments provide the ideal balance of compression and comfort.

Each compression garment incorporates gradient compression technology and strategically placed inner panels in key surgical areas for the right compression in the right places.

This precision design delivers better overall comfort and enhances healing. All garments are made from our strong, breathable powernet fabric that contours to your body shape. We use wide, adjustable Velcro® shoulder straps on all Vests and reinforced flat seams on all garments.

All garments are made in our California headquarters to ensure the highest possible quality.

The garments do not contain any Latex or formaldehyde, are available in a size range of S-4XL in Black and White colors.
